

Tim Webb
**Venture Capitalist and Independent Entrepreneurship
Consultant**

Mr. Webb is a private investor and advisor to early-stage technology companies. Over 35 years, Tim's professional pursuits having included hardware and software engineering, government policy analysis, and venture capital. Tim was trained in electrical engineering at the University of Pennsylvania and Imperial College London, after which he worked on space systems for the General Electric Company. After subsequently earning a Masters in Public Policy from the Kennedy School of Government, he spent ten years at the RAND Corporation leading research on a variety of national security and technology policy subjects. In the mid-1990s he switched focus to financing start-up technology companies, initially by organizing special purpose vehicles. This led to co-founding Inflection Point Ventures, where Tim originated and managed cybersecurity and enterprise software investments through two funds. He then returned to angel investing and periodic public policy consulting on topics at the intersection of finance, national security and innovation policy.
